

PREDOCTORAL POSITION IN STRUCTURAL BIOLOGY

Applications are invited for a **predoctoral position** in the group headed by Prof. Miquel Coll at the **Institute for Research in Biomedicine (IRB Barcelona) / Institute of Molecular Biology of Barcelona (IBMB-CSIC)** to work on the project “*Structure of DNA-binding proteins, complexes and molecular machines*”.

IRB Barcelona has been recognized as a “Severo-Ochoa” Centre of Excellence and the IBMB Structural Biology Unit as a “Maria de Maeztu” Unit of Excellence. The laboratory is located in the stimulating scientific and cultural environment of the Barcelona Science Park.

The 4-year position is funded by the MINECO (*Ministerio de Economía y Competitividad*, project-associated predoctoral contract).

Candidates should have an outstanding CV, high motivation for scientific research, and the ability to work in a competitive research team. Previous experience in a molecular biology or structural biology laboratory would be desirable.

Applicants should send a CV, a copy of their academic records with the average grade, and the names and addresses of 2 researchers or professors for references no later than **19th of June 2015**.

Interviews for short-listed candidates will be held during the week **22-26 June 2015**.

Those interested should contact:

Ms. Esther Fernández

Structural and Computational Biology Programme Secretary
