Raudel Sánchez Campusano (BSc. in Physics & PhD. in Neuroscience) / University Pablo de Olavide

CV date	January 22, 2024
----------------	------------------

Part A. PERSONAL INFORMATION

First and Last Name	RAUDEL SÁNCHEZ CAMPUSANO	Gender	Male
ID number / DNI	49527274V	Nationality	Cuban / Spanish
E-mail	rsancam@upo.es	URL Web	
ORCID code	https://orcid.org/0000-0003-3132-2769	Researcher ID	K-9254-2014

A.1. Current position

Position (Full time)	University Professor / PTU (Tenured Faculty)	Start Date	December 22, 2023
Institution/University	University Pablo de Olavide / Universidad Pablo de Olavide (UPO)		
Department/Center	Physiology, Anatomy and Cell Biology / Faculty of Experimental Sciences		
Country	Spain	Telephone number	(+34) 954 978 013
		Internal calls Ext.	68013
Keywords	Neuroscience, Neurophysiology, Neurophysics, Medical Physics, Biophysics		

A.2. Previous positions (research activity interruptions, art. 14.2.b)

Period	Position/Institution/Country
2018-2023	Assistant Professor / PAD / PCD / University Pablo de Olavide / Spain
2017-2018	Contract as Doctor associate to project / University Pablo de Olavide / Spain
2016-2016	Fulbright Postdoctoral Fellowship / Florida Atlantic University / U.S.A.
2014-2016	Postdoctoral Fellowship / Andalusian Government - UPO / Spain
2007-2013	Contract as Doctor associate to project / University Pablo de Olavide / Spain
2003-2007	PhD Student / University Pablo de Olavide / Spain
2001-2002	Third Cycle (DEA) Doctoral Program / University Pablo de Olavide / Spain
1998-2002	Junior Researcher / Biophysics and Medical Physics Center / Cuba

A.3. Education

PhD / Licensed / Graduate	University/Country	Year
Licensed (Degree) in Physics	University of Santiago de Cuba / CUBA	1998
Doctorate (PhD.) in Neuroscience	University Pablo de Olavide / SPAIN	2007

Part B. CURRICULUM VITAE SUMMARY (max. 5000 characters, including spaces)

My main scientific contributions and their relevance are summarized below:

VISUAL System contributions: I began my professional career at the Biophysics and Medical Physics Center of Cuba, working on the multimodal integration of brain images and signals. During this period, I participated as principal coordinator in a R&D&I Project of the Ministry of Public Health of Cuba, whose main results were the registration of an **Invention Patent** (SYSTEM AND METHOD FOR THE DYNAMIC QUANTIFICATION OF VISUAL EVOKED POTENTIALS. No. CU 22941 A1. Int. Cl⁷: A 61B 3/10), an **Intellectual Property Software** [**VISMAX** (**VIS**ual **MAX**imal analysis). CLASS 09: MEDICAL SOFTWARE OF APPLICATION FOR THE PHYSIOPATHOLOGICAL ASSESSMENT OF THE VISUAL PATHWAY, Res. No. 4168/2004; Trademark No. 2002-1107], as well as the clinical tests and exploitation trials of the invention; obtaining in 2005 the **Annual Health Award to “The Best Basic Research”**, granted by the Health Scientific Societies of Cuba.

CEREBELLAR Functioning contributions: I attended the Neuroscience Doctorate Program at the University Pablo de Olavide (UPO, Seville, Spain), where I obtained the **Diploma of Advanced Studies**. Then, I was granted a “Doctoral Fellowship for Foreigners” and I developed my **Doctoral Thesis in Neurosciences** (OPTIMIZATION OF ANALYTICAL AND EXPERIMENTAL METHODS FOR THE NEURAL AND MUSCULAR CONTROL OF LEARNED MOTOR RESPONSES: THE EYELID MOTOR SYSTEM, 11/23/2007) in the Neuroscience Division at UPO. In this period, my key contributions were the characterization of kinetic neural commands in the cerebellar/interpositus-red nucleus-motoneurons pathway and of the dynamic control of the eyelid kinematics. In this topic, I have made 6 highlighted articles as a principal author [*J. Neurosci.*, 27(25):6620-6632, 2007; *J. Neurosci.*, 29(34):10750-10763, 2009; *J. Neurophysiol.* 104(1):346-365, 2010; *Cerebellum* 10(4):702-710, 2011; *Front. Integr. Neurosci.*, 5(A39):1-28, 2011; *Front. Neuroanat.*, 6(A8):1-18, 2012], rounding my cerebellar contribution off with a seminal Consensus Paper [CURRENT VIEWS ON THE ROLE OF CEREBELLAR INTERPOSITUS NUCLEUS IN MOVEMENT CONTROL AND EMOTION. *Cerebellum* 12(5):738-757, 2013].

PATTERN Recognition and Spike-Sorting contributions: In this topic, I have supervised a **Doctoral Thesis** (C.R. Caro-Martín. PATTERNS RECOGNITION OF NEURAL DATA: METHODS AND ALGORITHMS FOR SPIKE SORTING AND THEIR OPTIMAL PERFORMANCE IN PREFRONTAL CORTEX RECORDINGS, 06/26/2017). The main outcomes were: the development and registration of another **Biomedical Software** [*VISSOR (Viability of Integrated Spike Sorting of Offline Recordings)*], No. 04-2018-941 / SE-386-17, Trademark No. M3664133]; a book chapter about the descriptive/structural/operational features of *VISSOR* software [IN: *ADVANCES IN COGNITIVE NEURODYNAMICS (VI) - Book from Springer* [ISBN 978-981-10-8853-7], Chapter 30: 235-242, 2018]; a relevant article on experimental applications of the *VISSOR* software to measure the time intervals in the rostral medial prefrontal cortex [*J Neurosci.*, 35(44): 14809-14821, 2015]; and finally, a highlighted article [*Sci. Rep.*, 8(A17796):1-28, 2018] where for the first time we propose a method/algorithm called K-TOPS, alluding to the combination of the well-known K-means method with the new Template Optimization in Phase Space (TOPS) method, which is a novel contribution in the field of Spike Sorting, to classify both single-unit spikes and overlapping waveforms.

BRAIN Connectivity contributions: I have a solid experience in the determination of neurophysiological markers by means of the spectral, synchrony, causality and connectivity analyses between neural recordings acquired from different brain sites and several experimental conditions [*Sci. Rep.*, 11(A2970):1-16, 2021; *Cereb. Cortex* 31(1):281-300, 2021; *Prog. Neurobiol.*, 183(A101692):1-13, 2019; *Sci. Rep.*, 6(A37650):1-17, 2016; *PLoS ONE* 11(2): e0148800, 2016; *Cereb. Cortex* 25(9):2542-2555, 2015; *J. Neurosci.*, 33(6):2293-2304, 2013].

BRAIN Stimulation contributions: I have also obtained some results in the brain stimulation, including both the experimental approach [*Proc. Natl. Acad. Sci. U.S.A.*, 109(17):6710-6715, 2012] and the computational model [*Brain Stimul.* 6(1):25-39, 2013], which have been recurrently cited in this specialized field of neuroscience due to their relevance.

In summary, I have made a total of **37 peer-reviewed publications**, of which 28 are of recognized prestige, and 20 of these are original scientific papers indexed in PubMed, with an **average impact factor of 5.27 points** [D1 (9), D2 (1), Q1 (4), Q2 (5), Q3 (1)]. I was part of the research team of **17 R&D&I projects** in which I was responsible for the optimization of the analytical-experimental design. Finally, I have also participated in undergraduate and postgraduate teaching [**12 Official Qualifications / Degrees**], and have supervised 7 Graduate Degree Thesis, 6 Master of Sciences Thesis and 1 Doctoral Thesis. I am currently the scientific supervisor of another 3 Doctoral Thesis projects registered and in progress. I have participated with scientific contributions in **69 Congresses**.

Part C. RELEVANT MERITS (sorted by typology)

C.1. Publications - C.1.1. Publications (with ISSN) / Scientific Articles – Papers (last 10 years)

<http://www.ncbi.nlm.nih.gov/pubmed/?term=Sanchez-Campusano+R>

1. A. Lintas*, R. Sánchez-Campusano*, et al. (2021) OPERANT CONDITIONING DEFICITS AND MODIFIED LOCAL FIELD POTENTIAL ACTIVITIES IN PARVALBUMIN-DEFICIENT MICE. *Scientific Reports* 11(Article 2970): 1-16, 2021. *These authors contributed equally. [2019 IF: 3.998].
2. M Mar Reus-García, R. Sánchez-Campusano, et al. (2021) THE CLAUSTRUM IS INVOLVED IN COGNITIVE PROCESSES RELATED TO THE CLASSICAL CONDITIONING OF EYELID RESPONSES IN BEHAVING RABBITS. *Cerebral Cortex* 31(1): 281-300, 2021. [2020 IF: 5.210].
3. A.R. Conde-Moro, F. Rocha-Almeida, R. Sánchez-Campusano, et al. (2019) THE ACTIVITY OF THE PRELIMBIC CORTEX IN RATS IS ENHANCED DURING THE COOPERATIVE ACQUISITION OF AN INSTRUMENTAL LEARNING TASK. *Progress in Neurobiology* 183(Article 101692): 1-13, 2019. [2018 IF: 10.658].
4. C.R. Caro-Martín, J.M. Delgado-García, A. Gruart, R. Sánchez-Campusano (2018) SPIKE SORTING BASED ON SHAPE, PHASE, AND DISTRIBUTION FEATURES, AND K-TOPS CLUSTERING WITH VALIDITY AND ERROR INDICES. *Scientific Reports* 8(Article 17796): 1-28, 2018. [2016 IF: 4.259].
5. A. Medrano-Fernández, J.M. Delgado-García, B. Del-Blanco, M. Llinares, R. Sánchez-Campusano, et al. (2018). THE EPIGENETIC FACTOR CBP IS REQUIRED FOR THE DIFFERENTIATION AND FUNCTION OF MEDIAL GANGLIONIC EMINENCE-DERIVED INTERNEURONS. *Molecular Neurobiology* 56(6): 4440-4454, 2019. [2016 IF: 5.076].
6. I. Fernández-Lamo, R. Sánchez-Campusano, et al. (2016) FUNCTIONAL STATES OF RATS CORTICAL CIRCUITS DURING UNPREDICTABLE AVAILABILITY OF A REWARD-RELATED CUE. *Scientific Reports* 6(Article 37650): 1-17, 2016. [2015 IF: 5.228].
7. M.T. Jurado-Parras, J.M. Delgado-García, R. Sánchez-Campusano, et al. (2016) PRESYNAPTIC GABA_B RECEPTORS REGULATE HIPPOCAMPAL SYNAPSES DURING ASSOCIATIVE LEARNING IN BEHAVING MICE. *PLoS ONE* 11(2): e0148800, 2016. [2015 IF: 3.057].

8. C.R. Caro-Martín, R. Leal-Campanario, **R. Sánchez-Campusano**, et al. (2015) A VARIABLE OSCILLATOR UNDERLIES THE MEASUREMENT OF TIME INTERVALS IN THE ROSTRAL MEDIAL PREFRONTAL CORTEX DURING CLASSICAL EYEBLINK CONDITIONING IN RABBITS. *Journal of Neuroscience* 35(44): 14809-14821, 2015. [2015 IF: 5.924].
9. A. Gruart, **R. Sánchez-Campusano**, et al. (2014). DIFFERENTIAL AND TIMED CONTRIBUTIONS OF IDENTIFIED HIPPOCAMPAL SYNAPSES TO ASSOCIATIVE LEARNING IN MICE. *Cerebral Cortex* 25(9): 2542-2555, 2015. [2015 IF: 8.665].

C.2. / C.3. Participation in R&D&I Projects (the 7 most recent of a total of 16 projects)

1. **Project Title:** DESIGN AND DEVELOPMENT OF AN OPTIMIZED ANALYTICAL-EXPERIMENTAL APPROACH TO EVALUATE THE SYNAPTIC STRENGTH AND THE FLOW OF NEURAL ACTIVITY IN CORTICAL AND SUBCORTICAL CIRCUITS. **Reference Code:** FEDER/UPO-1380660. **Principal Investigators:** Dr. Raudel Sánchez-Campusano. University Pablo de Olavide of Seville, SPAIN. **Financial Support:** 25.000,00 € - Under the Call for R&D&I Projects of 2020. **Supported by Grant from:** “European Regional Development Fund (ERDF)” / ERDF-ANDALUSIA Operative Program. **Period:** from 01/06/2021 to 30/06/2023.
2. **Project Title:** BRAIN/ENVIRONMENT INTERFACE USEFUL IN MEDULLARY LESIONS AND IN NEURODEGENERATIVE DISEASES. **Principal Investigators:** Agnès Gruart (PhD). University Pablo de Olavide of Seville, SPAIN. **Financial Support:** 82.500,00 € - Under the II Edition of the Call for Research Projects on Neuroscience of the Tatiana Foundation - 2016. **Supported by Grant from:** “Foundation: Tatiana Pérez de Guzmán el Bueno”. **Period:** from 09-12-2016 to 09-12-2019.
3. **Project Title:** LEARNING AS A FUNCTIONAL STATE OF THE BRAIN: STUDIES IN WILD-TYPE AND GENETICALLY MANIPULATED MAMMALS. **Reference Code:** BFU2014-56692-R. **Principal Investigators:** Agnès Gruart (PhD) and José M. Delgado-García (MD, PhD). University Pablo de Olavide of Seville, SPAIN. **Financial Support:** 400.000,00 € - Under the Call for Research Projects of 2014. **Supported by Grant from:** “Spanish Ministry of Economy and Competitiveness (*MINECO*) - State Program for Research, Development and Innovation Oriented to the Challenges of Society”. R&D&I Project co-financed by the European Regional Dev. Fund (ERDF). **Period:** from 01-01-2015 to 31-12-2017.
4. **Project Title:** CORTICAL AND SUBCORTICAL PROCESSES THAT MAKE POSSIBLE THE ACQUISITION OF NEW MOTOR AND COGNITIVE SKILLS. **Reference Code:** BIO-1388. Dr. José M. Delgado-García (MD, PhD). University Pablo de Olavide of Seville, SPAIN. **Financial Support:** 145.000,00 € - Under the Call for Research Projects of 2012. **Supported by Grant from:** “Andalusian Government - Research Projects of Excellence of the Andalusian Office of Innovation, Science and Business”. **Period:** from 30-12-2013 to 30-06-2017.
5. **Project Title:** FUNCTIONAL NEURONAL STATES THAT MAKE THE LEARNING AND MEMORY: STUDIES IN WILD TYPE AND TRANSGENICS MICE. **Reference Code:** P11-CVI-7222. **Principal Investigator:** Agnès Gruart (PhD). University Pablo de Olavide of Seville, SPAIN. **Financial Support:** 156.089,50 € - Under the Call for Research Projects of 2011. **Supported by Grant from:** “Andalusian Government - Incentives for Research Projects of Excellence of the Universities and Research Organizations of Andalusia”. **Period:** from 27-02-2013 to 27-02-2016.
6. **Project Title:** STATE FUNCTIONS UNDERLYING THE GENERATION OF LEARNED MOTOR RESPONSES. **Reference Code:** BFU2011-29286. **Principal Investigator:** Agnès Gruart (PhD). University Pablo de Olavide of Seville, SPAIN. **Financial Support:** 258.000,00 € - Under the Call for Research Projects of 2011. **Supported by Grant from:** “Spanish Ministry of Economy and Competitiveness (*MINECO*) - National Plan of R&D&I”. **Period:** from 01-01-2012 to 31-12-2014.
7. **Project Title:** HYPER INTERACTION VIABILITY EXPERIMENTS (HIVE). **Reference Code:** EU-RP7-222079-2. **Principal Investigator:** Giulio Ruffini (PhD). Starlab Barcelona SL, SPAIN. **Team Coordinator:** José M Delgado-García (MD, PhD). University Pablo de Olavide of Seville, SPAIN. **Financial Support:** 2.299.998,00 € (Grupo UPO: 283.329,00 €) - Under the Call for Research Projects of 2008. **Supported by Grant from:** “Seventh Framework Programme for Research of the European Commission - Theme 3: Inf. & Communication Technologies”. **Period:** from 01-09-2008 to 31-08-2012.

C.4. Patents / Software

1. A. Montoya, R. Sánchez-Campusano, J.M. Martínez, E.A. Milán-Garcés. **PATENT Number:** CU 22941 A1. **Int. Cl⁷:** A 61B 3/10.
